

Burger Time™

Product Description

Your job is to climb up the ladders and assemble an order of giant hamburgers. But you've gotta do it fast because you are being chased by killer hot dogs and very nasty fried eggs. Good thing you've got a pepper shaker. One shake and they are stunned. Hurry to get the lettuce drop on your edible enemies and don't run out of pepper. Get your buns in gear, pal, it's Burger Time!

Cross a platform to add that ingredient to your giant burger. Build as many burgers as you can. If intruders get too close, sprinkle pepper on them to stun them. If they fall into your burger and are included, you earn extra bonus points.

Tips and Tricks

Tip: There are six levels to the game. After completing the 6th level, the game restarts at a higher level of difficulty for six more levels.

FAQs

Is this the same Burger Time I played on coin-op or on my Nintendo system years ago?

The short answer is yes. This is the original version of Burger Time by Data East brought over to your mobile phone.

What are those things chasing my chef?

Some are fried eggs and others are hotdogs, the traditional culinary enemies of the all-American hamburger.

Why shake pepper on them?

Because the pungent pepper stuns your enemies so you have time to escape and continue your frantic food preparation.
